Art Unit: 3753

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or
(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

Claims 1 -29 are rejected under 35 U.S.C. 102 (e) as being anticipated by Bakels et al. Bakels et al teaches a method for operating a cardiac pacemaker comprising sensing atrial (111) and ventricle (110) depolarizations, having a atrial fibrillation mode (120) and a primary pacing mode (121), wherein the resynchronization pacing is delivered in the left ventricle (106). Bakels et al also discloses ventricular synchronization pacing and rate-adapting pacing (see column 9, lines 29-37).

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
